

Capital Investment Planning

Project reschedule request

This form is to be used to request the reconsideration of the planned delivery date of a Water Corporation Capital Investment Planning Project. This form is not to be used to request reprioritisation of a project already within the 5-year program.

The following questions form the basis on which we assess and prioritise expenditure on capital growth projects.

A developer wishing to seek reconsideration of the planned delivery date of a Capital project should address the following criteria in as much detail as possible.

- 1. What is the current land zoning under the Regional and/or Local Planning Scheme?**
- 2. Has a Structure Plan (local and/or district) been endorsed by the Local Authority and/or the West Australian Planning Commission?**
- 3. Does the development feature on the Urban Development Program or support another State Government Development Objective?**
- 4. Is the development an incremental expansion of existing developments?**
- 5. How does the proposed rate of development compare with adjacent developments rates (actual and planned)?**

6. **What is the land ownership or tenure where the capital infrastructure is proposed?**

7. **Can the infrastructure be constructed now without the need for temporary components?**

8. **Does the development require any other statutory approvals (Water Management Reports, Environmental, Main Roads)? If yes, what are the status of these?**

9. **Are there other constraints that have been dealt with, or still require being dealt with?**

Please attach any supporting information that may assist us in assessing your request.
