

Trace the stormwater path

When it rains, some water enters water bodies such as lakes, w _ _ _ _ _ and rivers. Some s _ _ _ _ into the ground and enters the groundwater and some runs off into d _ _ _ _ _ systems.

The water entering drainage systems, which is called s _ _ _ _ _ , goes through pipes to rivers, wetlands or the ocean. It can carry p _ _ _ _ _ that are h _ _ _ _ _ to the plants and animals that live in these water bodies.

You can help prevent this by making sure you and your household don't put harmful things into the system.
